

INDUCTION PROGRAM FOR M.SC. PHYSICS, 1ST SEMESTER STUDENTS

4 Aug
2025

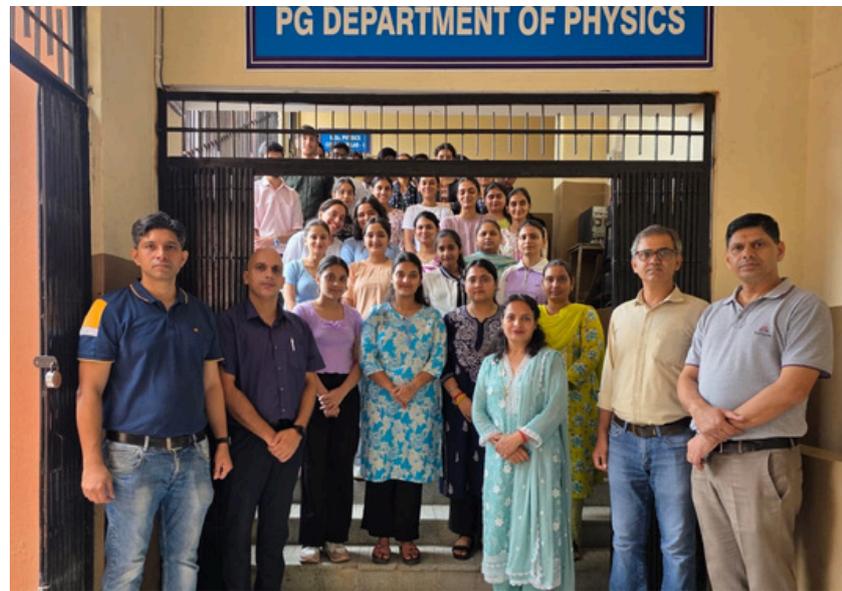

STUDENT - TEACHER INTERACTION

Welcoming the New Batch

The Induction Program began with a warm welcome extended to the newly admitted MSc Physics 1st semester students at the department gate. Faculty members and seniors greeted them with enthusiasm, creating a positive and friendly atmosphere. This initial gathering served as a great opportunity for informal interaction and helped juniors feel more at ease in their new environment.

Classroom Introduction Session

After the welcome, an introductory session was held in the classroom. The teachers greeted the students and introduced themselves along with their areas of specialization. They gave an overview of the semester, covering subject codes, course structure, and academic expectations. The session was interactive and informative, helping the juniors get a clear idea of how the semester would unfold.

Interaction Between MSc Second Year and First Year Students

As part of the Induction Program, an informal interaction was held at Vatika Vihar where MSc 1st and 3rd semester students spent time together in a relaxed setting. This session gave juniors a chance to connect with their seniors, ask questions, and learn more about the course and department.

Seniors shared their experiences, study tips, and insights into academic life. The friendly atmosphere helped build a sense of comfort and support among students from both batches.

After the interaction at Vatika Vihar, the students visited the college library. Seniors guided the juniors and introduced them to the library facilities, including the reference section, journal racks, and the process for issuing books.

This visit helped the first-year students understand how to access academic resources and use the library effectively during their coursework.

The final stop of the day was the college's Indoor Stadium, where juniors and seniors explored the sports and fitness facilities available on campus. Seniors introduced the space as not just a place for games, but also for relaxation and extracurricular engagement. This visit highlighted the importance of maintaining a healthy balance between academics and physical well-being during the MSc journey.

Candid Glimpses: The Lighter Side of the Day

During our time at Vatika Vihar, as seniors shared their experiences with juniors — from handling practical exams to preparing for theory papers — several candid moments were captured unintentionally. These behind-the-scenes photos reflect the informal and genuine atmosphere that developed during the interaction.

Outside the college library, a small but thoughtful gesture added warmth to the day — seniors offered chocolates to the juniors as a welcome treat. While meant as a simple interaction, the moment turned into a mix of cheerful expressions.

Acknowledgment

I would like to sincerely thank our respected faculty members for their guidance and support in organizing this induction program. My heartfelt appreciation also goes to all my classmates for their active participation and efforts in making the event meaningful and welcoming for our juniors. Special thanks to our 1st semester students for their enthusiastic involvement — we hope this marks the beginning of a great academic journey ahead.
